

IN THE CLAIMS:

Please cancel Claims 1-13 without prejudice or disclaimer of the subject matter recited therein.

Please add new Claims 14 and 15 as follows.

1. to 13. (Cancelled).

14. (New) An image display panel of the reflection type comprising, in a multilayer structure:

    a first layer including a periodic planar arrangement of a plurality of electrophoretic elements, each of the plurality of electrophoretic elements included in the first layer showing one of an opaque black state and a transparent state in response to an input signal; and

    a second layer including a periodic planar arrangement of a plurality of electrophoretic elements, each of the plurality of electrophoretic elements included in the second layer showing at least a first color state and a second color state in response to an input signal,

    wherein an arrangement period of the electrophoretic elements included in the first layer is smaller than an arrangement period of the electrophoretic elements included in the second layer.

15. (New) The image display panel of the reflection type according to claim 14, wherein the second layer includes a first electrophoretic element and a second electrophoretic element, the first electrophoretic element having a green state and a red state, and the second electrophoretic element having a blue state.
